

Faces and Places

Aug. 24, 2014

The Santa Fe Watershed Association has added Jesse Roach to its board of directors.

Roach has a bachelor's and a master's degree in civil and environmental engineering from Stanford and a doctorate in hydrology and water resources from the University of Arizona. He works as a hydrologist at the Santa Fe office of Tetra Tech Inc., an environmental consulting company, and is an expert on potential climate change impacts in the Rio Grande basin. He also is likely to be found hiking, biking, golfing, skiing or playing soccer somewhere in the Santa Fe River watershed.
